

# Fly in my Email Dennis Stead

## Cerise Jig

2/13/2020

Mike Kidd is a fishing superman. Last year he caught over 1,000 trout. So far this year his total is reaching 300. I going to keep an eye on him and share with you what flies he might be using.

Last week he was using a Cerise jig as his first fly under an indicator and the second fly was a Ruby2. This fly in my email will be to show you how to tie the Cerise Jig.

Add a thread base to the bend of the hook. Tie on your Cerise Chenille. During the winter Mike uses a 1 1/2 to 2 inch tail and changes it during the summer to 1 to 1 1/4 inch tail. I used about 4 turn of thread and made sure it was tied down tight and secured.

Lift up the tag end of the chenille and bring my thread to the front. Wind the Chenille forward and tie off.

Whip finish and add some of Dave's flex cement. You are almost finished. Using your Bic lighter, melt the end of the tail to seal the chenille from unwrapping. Be careful that you don't set it on fire, like I did.

The Cerise Jig is an attractor fly. Tie on your favorite midge or the Ruby2, like Mike does.

Coming next is the Ruby2.

What do you think? Let me know.

Cerise Jig

### Materials:

Hook: 90 degree jig 1/100  
Hook sizes: 8, 10  
Thread: UNI-Thread 8/0 Pink  
Tail and Body: Ultra Chenille Standard Fl. Cerise

The Fly tied by Dennis Stead - size 8 hook.

Check out my fly tying video: <https://youtu.be/rboANS50NzA>

Fish under a strike indicator as your main fly. Tie on a Ruby2 midge as your second fly.

If you do not want to receive this and would like to be removed from my email, just let me know. I will remove your email address.
