

Fly in my Email Dennis Stead

Woolly Buggers

2/19/2020

There are many ways to tie a woolly buggler and this is just one way. Debar the hook, add a bead and then add 10 turns of lead or non lead wire.

Put down a thread bass to secure your lead and cover the hook with your thread to the bend.

Add your marabou for the tail.

Tie in your hackle feather and bring your thread to the front. Tie in 3 peacock herl, then tie in Madeira. Take your thread, the 3 peacock herl and the Madeira. Hold everything at a 45 degree angle and rotate you rotary vise.

Both, Lefty Kreh and Gary LaFontaine, twisted their materials together before winding the body. The body is indestructible.

Wind your twisted materials back to the bend of the hook, forming the body and tie off with your thread. Bring thread to front.

Palmer your hackle to the front and tie off. Add some of Dave's flex cement. Pinch of any excess marabou.

What do you think? Let me know.
